## **EXECUTIVE SUMMARY**

The Muhimbili University of Health and Allied Sciences (MUHAS) started as the Dar es salaam medical school in 1963. The school then transformed into the faculty of medicine, then to prospective college, and became a full-fledged university following the signing of the Charter by His Excellence the President of the United Republic of Tanzania in 2007. MUHAS has grown from a small unit with an enrolment of only 10 students and a single program, Doctor of Medicine, to an institution with an enrolment of 4200 students with a total of 90 academic programs.

Planning has been an important aspect of institutional management and governance with development of Corporate Strategic Plans (CSP), which covers the period 2014/2015 to 2023/2024. The CSP has been implemented as Medium Term Strategic plan (MTSP) during the period of 2017/2018 to 2019/2020. The MTSP had Eight (8) Strategic Objectives which addressed core functions of the University (Teaching, Research and Public Services including health provision) and other related support areas such as financial sustainability, human resource, gender, social interaction and environmental sustainability. Moreover, the plan included two sectorial objectives related to the fight against HIV/AIDS and anti-corruption. This plan brings aboard targets, which were not entirely achieved during the previous implementation cycle and new issues as per University commitment highlighted in the Minister of Education Science and Technology in respective government budget.

Current MUHAS development involves the construction of Centre of Excellence for Cardiovascular Sciences and continued construction of academic and administrative facilities at Mloganzila. In this new plan the University will also focus on increase of student enrolment after completion of construction of new academic and administrative infrastructures at Mloganzila.

The MUHAS Strategic Plan (SP) has also aligned its objectives to the National Five Year Development Plan, which aims at unleashing Tanzania's latent growth potential in becoming a middle-income country as envisaged in the Vision 2025. In achieving this objective the Plan focuses on one of the key priority area, which is "development of human capital". In this case, MUHAS intends to play a positive role in addressing impediment to poverty reduction by increasing the number and diversity of highly trained health care providers and managers of health systems.

## CHAPTER 1 INTRODUCTION

## 1.1 Background

Muhimbili University of Health and Allied Sciences (MUHAS) came into being following the signing of the Charter establishing this institution as a full-fledged University by His Excellence the President of the United Republic of Tanzania in 2007. MUHAS was conceived in 1963 when the then Dar es Salaam School of Medicine was established. In 1968 the School became a Faculty of Medicine and was upgraded to a constituent College of the University of Dar es Salaam in 1991. MUHAS has grown from a small Unit with an enrolment of 10 students and a single program, Doctor of Medicine (MD) to an institution with an enrolment of 4,200 students with a total of 91 accredited academic programs, which includes 10 diploma programs, 14 undergraduate programs and 67 postgraduate programs. It has developed from a Faculty of Medicine, which housed all current academic units as departments to an institution with 5 Schools, 2 Institutes and 12 Directorates.

The constituent schools and institutes of MUHAS include; School of Medicine, School of Pharmacy, School of Dentistry, School of Nursing, School of Public Health and Social Sciences, Institute of Allied Health Sciences and the Institute of Traditional Medicine. The directorates include; Directorate of Planning and Investment, Directorate of Postgraduate Studies, Directorate of Research and Publication, Directorate of Information and Communication Technology, Directorate of Continuing Education and Professional Development, Directorate of Library Services, Directorate of Undergraduate Students Services, Directorate of Human Resources Management & Administration, Directorate of Quality Assurance, Directorate of Estates and Directorate of Finance.

This Strategic Plan (SP) plan is guided by the national development framework, Vision 2025, the National Strategy for Growth and Poverty Reduction (NSGRP), the National Health Policy, the Higher Education Policy and Manifesto of the ruling party. MUHAS as the largest and long-standing public institution in Tanzania that offers training leading to degrees in the field of health sciences has to take a leadership role in the implementation of the higher education policy and in responding to the national needs for human resource for health. While the newly established Universities offering training in health sciences complement the role of MUHAS in the production of human resource for health, the majority of these personnel are produced at MUHAS. In order for MUHAS to contribute effectively to the national

needs of human resource for health to achieve the World Health Organization (WHO) minimum density of 2.5 health workers per 1000 people as a prerequisite for achieving the millennium development goals; the University should be supported to grow and expand in terms of infrastructure development and human resource capacity. MUHAS has gradually and consistently increased student enrolment, as well as number and diversity of academic programmes. However, there has not been a corresponding increase in infrastructure and human resource capacity development. This strategic plan is therefore poised to strengthen networking and partnership in implementing the action plan and to effectively mobilize resources and develop effective strategies for human resource development. In the implementation of the new revised plan, the University is focused on construction of academic facilities at Mloganzila and continue upgrading the existing infrastructures at the Muhimbili Campus and Bagamoyo Teaching Unit.

The revised plan follows an assessment of the existing plan and the need to align MUHAS plan with the Medium-Term Expenditure Framework (MTEF). The revised three-Year Plan will run for five years from 2020/2021 to 2024/2025.

## 1.2 The Major Roles and Functions of the University

The functions and activities of the University are guided by the following components of the mission as stipulated in the Charter that established the University: -

- 1.2.1 To provide in Tanzania a place of learning, education, research in health and allied sciences and through these provide service of a quality required and expected of a University institution of the highest standard and maintain the respect for scholarly and for academic freedom.
- 1.2.2 To prepare students through regular and professional courses in the fields of health and allied health Sciences for degrees, diplomas, certificates and other awards of the Muhimbili University of Health and Allied Sciences.
- 1.2.3 To contribute to the intellectual life of Tanzania, to act as a focal point for its cultural development and to be a center for studies, service, and research pertaining to the interests of the people of Tanzania.
- 1.2.4 To be the main producer of personnel in the health sector, key policy makers, and other experts in the health sector.
- 1.2.5 To be a catalyst in the health sector reforms through conducting relevant research and educating the public in health-related issues.
- 1.2.6 To offer consultancy services in Medicine, Pharmacy, Dentistry, Nursing, Public Health, Information technology and Traditional medicine.

#### 1.3 Core values

In order to realize the vision and fulfill its mission, MUHAS shall be guided by the following values:

- 1.3.1 Social responsibility, accountability and leadership in responding to issues and expectations of the society.
- 1.3.2 Public accountability through transparent decision-making, open review, responsible and efficient use of resources.
- 1.3.3 Institutional autonomy through self-governing structures and greater independence in action while being responsive to societal needs.
- 1.3.4 Professional and ethical standards of the highest order, practiced through openness, honesty, tolerance and respect for the individual.
- 1.3.5 Equity and social justice with regard to gender, religion, ethnicity and other social characteristics.
- 1.3.6 Academic freedom in critical thoughts and enquiry as well as the open exchange of ideas and knowledge.
- 1.3.7 Academic integrity and professional excellence in teaching, research and service provision.
- 1.3.8 Nationalism and internationalism in scholarly activities of national and global concerns
- 1.3.9 Productivity, innovation and entrepreneurship in all activities of the University underpinned by a dedication to quality, efficiency and effectiveness.
- 1.3.10 Human Resource of the highest quality capable of enhancing the realization of the vision and mission of the University.
- 1.3.11 The right to enjoy intellectual, social, cultural and recreational opportunities, for students and staff

## 1.4 Purpose of the Plan

The purpose of this strategic plan is to guide MUHAS performance of its core functions through priority setting for efficient and effective resource allocation, creation of relevant institutional structures and increasing the levels of institutional, departmental, and individual accountability. The plan also intends to improve transparency and communication between management, employees and stakeholders as well as providing a framework for monitoring and evaluation of institutional performance.

## 1.5 Methodology

Through a participatory process the university developed a ten years CSP (2014/2015 to 2023/2024) which formed the basis for development of a Five-Year Development Plan as an implementation tool. To align the strategic plan with Medium-Term Expenditure Framework (MTEF) the SP was reviewed to develop a Medium-Term Strategic Plan (MTSP), which was implemented in 2017/2018 to 2019/2020. The review of the strategic plan started from the University constituent units, which included all stakeholders with the participation of the University management under the leadership of the Vice Chancellor, the unit submitted their progress implementation report to Directorate of Planning and Investment for review and incorporation into main report of which later was used to review the Strategic Plan and come up with the draft reviewed Corporate key result areas.

The draft reviewed corporate key result areas were presented to the University leadership including Deans, Directors, Heads of departments and key technical and administrative staff. The office of DPI organized a strategic planning workshop to assess the implementation of the 2017/2018 to 2019/2020 MTSP. During this time, the university discussed achievement of the previous three years and also identified areas for improvement. Among issues raised during the review was poor linkage between university objectives and Medium-Term Expenditure Framework, which makes it difficult for the university to develop budget to fueled plan. Members reviewed the MTSP objectives, developed new targets and activities, which were then consolidated to form the basis for the University-wide Strategic plan.

## 1.6 Layout of this Plan

This document is organized in four Chapters. The first chapter provides a brief summary of the MUHAS historical background, Core values and purpose of the plan, and the methodology of development of this plan. The second chapter covers the performance review of the performance of the implementation of the 2017/2018 to 2019/2020 MTSP. Chapter three provides a summary of stakeholder's analysis including the Strengths, Weaknesses, Opportunities and Challenges (SWOC) analysis, critical issues and current issues to be considered in this plan are presented. Chapter four presents new plan with revised objectives and their justifications. Chapter five tabulates the targets, strategies and key performance indicators, timelines and responsible entity for each of the objectives presented in this plan. Last chapter (chapter six) provides the financing sources, implementation, monitoring and evaluation system.

## CHAPTER 2 PERFOMANCE REVIEW

## 2.1 Previous MTSP for period of 2017/2018-2019/2020

The ongoing Medium-Term Strategic plan (MTSP) for the period of 2017/2018 to 2019/2020 had Eight (8) strategic objectives which addressed core functions of the University and other related support areas such as financial sustainability, human resource, gender, social interaction and environmental sustainability. Moreover, the plan included two sectorial objectives related to the fight against HIV/AIDS and anti-corruption. These objectives were informed by previous SWOC analysis and stakeholder review.

- i. Objective A: Teaching, Learning and Assessment Methods Enhanced
- ii. Objective B: Research and Consultancy Quality and Capacity Improved
- iii. Objective C: Quality evidence-based health care and supportive services to patients, clients and the community strengthened
- iv. Objective D: Responsive HR Management and Governance Enhanced
- v. Objective E: Sustainable Financial Capacity and Accountability Enhanced
- vi. Objective F: Gender Mainstreamed, Environmental Management and Social Welfare Improved
- **vii. Objective G**: HIV and AIDS infections reduced and Supportive Services Improved
- viii. Objective H: Implementation of National Anti-Corruption Strategy Enhanced and Corruption Incidences Reduced

## 2.2 Performance Review

This section summarizes the present performance in the implementation of agreed objectives and targets, achievements, constraints and proposed remedial actions of the MTSP implemented in the 2017/2018 to 2019/2020.

Objective A: Teaching, Learning, Assessment Methods and infrastructure Enhanced by June 2019 **Targets** Planned activities Achievements Planned remedial Action in the Medium Term Strategic Plan 2020/2021-2024/2025 Performed Reason for Target activities Achieved deviation Utilize Limited Financial Roll over Strengthen Internet 80% E-learning Internet bandwidth resources platform by at connectivity upgraded from least 30% of all ■ Train faculty on 30Mbps to programs by Slow response use of e-learning 80Mbps to June 2019 from some of the support teaching platform Train students and learning departments on use of ■ Total of 13 e-learning courses added platform in e-learning platform ■ 10 trainings conducted to date Currently we have 2597 users. ## CHAPTER 3 SITUATION ANALYSIS

## 3.1 Environmental Scanning

Both Internal and External environmental analysis was conducted in order to identify key strategic issues as described in subsections 3.1.1 and 3.1.2

#### 3.1.1 Internal Analysis

#### 3.1.1.1 Governance and management

The University's desire is to improve governance and management systems, MUHAS is in the process of developing new organization structure (restructuring) with the thrust of reducing cost centers while putting in place mechanisms for effective communication and timely decision making. Also it should be noted that all matters pertaining to governance and management of the University are provided for in the MUHAS Charter. In addition to its Charter, MUHAS has come up with a number of policies in line with its vision and mission and provide a sound framework for realization of its functions. For example, the Human Resource Management Policy facilitates a competitive and dynamic human resources planning, recruitment, deployment and development. However, there are areas that require improvement such as: (i) a need to work out optimal manning levels across the University including ensuring quality of both academic and administrative staff; (ii) staff development, remuneration, motivation and retention; and (iii) effective operationalization of the OPRAS.

#### 3.1.1.2 Financial resource and management

MUHAS has three major sources of funding namely the Government Subvention, Development Partners (DPs) and internally generated funds whereby the former is the major contributor. In recent years the Government changed the mode of financing the University, which resulted in declining of funding for other charges (OC). Given the shortage of funds, the University has been compelled to look for alternative ways of raising funds including proposing the establishment of MUHAS Investment Holding Company, which is currently being operationalized through the Director of Planning and Investment (DPI)

#### 3.1.1.3 Linkages and networking

MUHAS continued to establish collaborations with local, and international organizations through Memorandum of Understanding (MoU). The links involve international organizations in which collaborative research and consultancies are prominent. Other links include universities, with whom collaborations involve activities such as student and staff exchange, exchange of external examiners and joint (sandwich) training and capacity building programmes. As an indication of MUHAS's increasing significance and standing in the international platform, the number of international links has been growing at a faster rate than the local ones. The University therefore needs to maintain and strengthen these links and make concerted efforts to promote local and regional ones in order to further increase relevant research productivity.

#### 3.1.1.4 Infrastructure and teaching facilities

The University has been striving to increase enrolment but challenges of inadequate infrastructure to accommodate large classes and new degree programmes; and office space especially for newly recruited staff still exist. The expansion of student enrolment and increase in academic programmes lead to urgent need for additional teaching, learning and administration facilities. Given this situation the university initiated a process of expansion through establishment of a new campus at Mloganzila. To realize this goal the University has started construction of the centre of excellence of cardiovascular Sciences and academic facilities. However, Mobilization of financial resources for the construction of academic and support facilities is ongoing.

#### 3.1.1.5 Human Resource Development and Management

Human resource is an important element for institutional development. MUHAS as a growing institution is still lacking adequate human resource. For the case of academic staff, the University also lacks a pool of qualified and competent individuals available for recruitment in some of the disciplines. However, for the technical and administrative staff the University has limited resources to recruit and retain the most qualified and competent staff. Availability of employment permits is also a challenge. The increasingly ageing academic staff population and planned expansion to the new campus at Mloganzila necessitate the University to urgently put in place an effective human resources development and succession plan. This plan will guide strategic recruitment from the pool of capable students and others, as well as putting in place an induction programme for newly employed staff and ensuring effective gender mainstreaming and equity.

#### 3.1.1.6 Teaching and Learning

Teaching and learning is one of the main core functions of the University and requires major investments in terms of human and financial resources in order to effectively meet the expectation of the stakeholders.

In order to create conducive teaching and learning environment it is necessary to promote social interaction among students and staff. As a means of realizing this objective, MUHAS plans to put in place social structures to enhance interaction among students and staff. MUHAS graduates should be of high quality with pre-requisite competence, appropriate code of professional conduct and values. Towards this end MUHAS revised its programs from traditional to competency-based and introduced professionalism as one of the competency domains. The delivery of University academic programmes is central to its core functions and reflects its professional and technical output.

The number of academic programmes has been increasing consistently over the past five years from 65 in the year 2009/2010 to the current 90 programmes in the year 2019/2020. The objective of developing the new programmes was dual and dictated by the higher education policy requirement of meeting the national needs for specialized skilled personnel and expanded student enrollment programme. The increased number of programmes and expanded student enrolment entails parallel increase in both human and non-human resources. The current number of academic staff needs to be increased in order to cope with the increased number of students and academic programmes.

#### 3.1.1.7 Research Development and Management

Research is one of the core functions of the University aiming at the generation and advancement of knowledge. MUHAS is one of the major institutions undertaking health research in the country and the research results generated have provided valuable evidence-based information for guiding the management, control and prevention of major diseases. The University research agenda targets major health issues including; HIV and AIDS, Tuberculosis, Malaria, Reproductive and Child Health, Non-communicable diseases, Injuries, Health Systems, Neglected tropical diseases and Health professions educational research. Research at MUHAS is undertaken by staff and students.

Research at MUHAS has been generally donor dependent and the Government support over a number of years has been less than 2%. However, the Government has continued to provide salaries of the University staff and costs of the institutional infrastructure and facilities, which is a significant contribution in terms of the total research costs. Given the importance of research, the Government has the responsibility to increase research funding for the University in order to encourage the undertaking of relevant research for national development.

#### 3.1.1.8 Gender and Equity

In order to address gender issues, MUHAS established a gender unit, allocated an office, appointed a coordinator and developed gender policy and guidelines and the anti-sexual harassment and discrimination policy. MUHAS has in essence been implementing the national agenda for gender mainstreaming through increased female student admission, as well as hosting and attending gender sensitization workshops. However, the institution needs to expand the gender programme of activities, maintain and support the initiatives that have been made in order to adhere to the national affirmative action for gender mainstreaming. In order to ensure equal access MUHAS continues to operate as an equal opportunity institution.

#### 3.1.2 External Analysis

#### 3.1.2.1 Political, Economic, Social, Technological and Legal (PESTEL)

#### i. Political

Tanzania is expected to remain politically stable in the foreseeable future, as it has been in the past. Tanzania has enjoyed five smooth political transitions of Government and this point out that there is little risk of political instability in the future. This is in keeping with the Tanzania Development Vision (TDV) 2025 that place emphasis on peace, stability and unity. This political environment augurs well with conceptualization, initiation and implementation of this Five Year Rolling Strategic Plan (FYRSP)

The TDV 2025 envisions the nation becoming a well-educated and learning society whose people are ingrained with a developmental mindset and competitive spirit. Vision 2025 strives to make a nation whose people have a culture, which cherishes human development through hard work, professionalism, entrepreneurship, creativity, innovativeness and a high level of quality education in order to respond to development challenges and effectively compete regionally and globally. This desire is very well captured by the Vision of the Ministry responsible for education stated in its Education and Training Policy (2014). Against this background, Tanzania's strategic direction is to transform the country to a middle-income country by the year 2025, with a diversified and semi-industrialized economy that is growing at 8% and above. MUHAS intends to play a positive role by increasing the number and diversity of highly trained health care providers and managers of health care systems. MUHAS will also continue to give high priority to research activities that aims at improving care and reducing the burden of most prevalent diseases in Tanzania.

#### ii. Economical

Tanzania has experienced a strong economic growth year over the past decade. The country's economy has become significantly more open, and the trade-to-GDP ratio has increased annually and ranked amongst the highest growth rate within the East African Community countries.

#### iii. Social

Tanzania is experiencing improvement in social services especially access to education, health, water, energy, telecommunications and infrastructure. Access to education has increased at all levels; with tremendous increases in the number of secondary school students as a result of the Secondary schools were established among others. The number of primary and secondary school students is expected to increase as a result of the new resolution of the Fifth Phase Government that has committed itself to provide free education to this cadre. This situation will be aggravated by the increasing Tanzanian population whose majority are youth. The increasing number of secondary school students and especially A- level students has had a direct impact on the capacity of higher education institutions to absorb or enroll the expanded outputs from lower levels. Consequently, the demand for higher education is inevitable, and necessitates expansion in enrolment capacity of universities and colleges in order to absorb the increased A-level outputs. It is therefore important for MUHAS to expand the learning and teaching infrastructure and the overall environment in order to enhance the student enrolment expansion programme.

#### iv. Technological

The world is experiencing rapid scientific innovations and technological advancement especially in the communication sub-sector. Information and Communication Technology (ICT) has changed the way people and institutions function. Technologies for data and information production, management and dissemination have been merged resulting into a global village with massive information that is freely accessible in the public domain. Institutions that have the expertise, appropriate infrastructure and equipment can use ICT to improve substantially the performance of their people and their respective organizations. The Government of the United Republic of Tanzania (URT) has opted to go e-government and is investing heavily in ICT infrastructure particularly laying the fibre optic cable to all regions. These efforts are consonant with the National Information and Communication Technology Policy (NICTP) which aim at facilitating the country bridge the "digital divide", by transforming its economy into a knowledge-based economy, able to effectively compete in the global economy. Additionally, the Higher Education Development Programme places emphasis on the need to promote the use of ICT for teaching and learning, research and communication in higher learning institutions. Hence, acquisition of modem ICT hardware and software to keep abreast with these technological developments is essential. The construction of national fibre backbone where MUHAS is also connected provides a good opportunity for the University to be linked with the outside world and increasing efficiency and effectiveness in training, research and provision of services.

#### v. Legal

Legally, MUHAS has its Charter as provided for by The Universities Act of 2005 and is fully accredited by the Tanzania Commission for Universities (TCU). Through accreditation TCU provides quality assurance services, coordination and rationalization of training programmes, and promotes cooperation among universities in the country. Besides this legal framework, the University is also guided by a number of education and training policies that provide a coherent philosophy for the development and management of education in Tanzania.

#### vi. Competition with other universities

For many decades, MUHAS was the sole university offering programmes in health and allied sciences in the country. Recently, existing and emerging Universities (both public and private) have decided to establish Colleges of Health and Allied Sciences offering similar programmes. This trend coupled with a decreasing pool of qualified students to join Universities will make MUHAS face stiff competition during admission. Given this scenario, MUHAS should position itself to face the realities while striving to continuously innovate including attracting different types of students using a range of delivery methods; and overall improvement in the teaching and learning environment. This may include improvements in quality of programmes being offered, increasing lecture theatres/rooms, accommodation premises, cafeteria, study rooms, library and recreational facilities. In general, MUHAS must strive to sustain excellence in teaching, learning and research if it has to remain competitive.

### 3.1.3 Stakeholders analysis

The stakeholders of MUHAS are those who have interest in or are direct or indirect affected by the operations of the University. The major stakeholders of the University which have been identified include: - Government, Donors, Community, Other universities, Industries, Investors, Collaborating training hospitals, students and employers, Professional Boards and staff.

No	Stakeholder	Service/Product offered	Expectations	Impact if expectation not met	Ranking
1	Government	Funding Policies	High	High	1
2	Donors	Funding	Moderate	Moderate	2
3	Community	Students Patients	High	High	1
4	Other	External examiners	Moderate	Moderate	2
	University	Exchange programs			

5	Industries	Field placement Product spine off Investment	Moderate	Moderate	2
6	Investors	Investment and funding	Low	Low	3
7	Collaborating training hospitals	Teaching space and facilities	Moderate	Moderate	2
8	Students	Quality and relevance of the training Programmes	High	High	1
9	Employers	Feed back on the relevance and quality of academic programmes offered	High	High	1
10	Professional Bodies	Provision of professional ethics	Moderate	Moderate	2
11	Staff	Self Motivated staff, trained and experienced staff	High	High	1

## 3.2 **SWOC Analysis**

The SWOC analysis involved a review of the progress of the implementation of the MTSP in line with the university vision and mission. The analysis was done by the key stakeholders from all University Departments and Units, the process involved documentary review, assessment of internal and external environment (Strength, weakness, Opportunities and weakness-SWOC) under which the institution operates was done to link the strategic plan with the current vision of the Government towards 2025 middle economy country.

## 3.2.1 Strengths, Weaknesses, Opportunities and Challenges (SWOCs analysis

## 3.2.1.1 SWOCs analysis in Teaching and Learning

#### Strengths

- i. Access to the Muhimbili National Hospital, Jakaya Kikwete Cardiac Institute, Muhimbili Orthopaedic Institute and Ocean Road Cancer Institute, with the potential of having a variety of patients within specialized clinical disciplines.
- ii. Highly trained human resource capable of teaching undergraduate and postgraduate students.
- iii. Indigenous experts who know the local conditions well

- iv. Community based integrated competency based curricula addressing both local and global health problems with the potential to produce graduates capable of serving in local and international arena.
- v. Diversity of disciplines that can facilitate enhanced teaching capabilities.
- vi. Extensive links and co-operation with international institutions and organizations.
- vii. Long-term academic reputation.
- viii. Availability of Information Communication and Technology (ICT) infrastructure.
- ix. Availability of a good number of staff skilled in ICT application.
- x. Modularized curricula, which give flexibility to both staff and students.
- xi. Availability of Mloganzila land for development into a new University campus with a university teaching hospital.
- xii. Availability of lands for potential development into satellite teaching facility and investment.
- xiii. Availability of a Centre for Health Professional Education.

#### Weaknesses

- i. Shortage of academic members of staff in some disciplines.
- ii. Inadequate resources to motivate and retain staff.
- iii. Inadequate ICT facilities for students and staff.
- iv. Inadequate skills by some staff to utilize ICT.
- v. Shortage of office space for staff.
- vi. Lack of funds for maintenance of physical infrastructure.
- vii. Gender imbalance among students and staff.
- viii. Inadequate teaching and learning facilities.
- ix. Lack of effective succession plan due to various external factors including inability to employ

## **Opportunities**

- i. Popularity of academic programmes offered by the University.
- ii. Existence of regional and district resources for clinical teaching.
- iii. Increased demand for higher education in the health sector.
- iv. Society demand for specialized services in health and related disciplines.
- v. Abundant research output for enriching teaching.
- vi. Political support from the Government.
- vii. Conducive environment for linkages with other partners.
- viii. Availability of employment opportunities for MUHAS graduates.
- ix. Available market for MUHAS consultancy services.
- x. Available pool of potential students.

#### **Challenges**

- i. Inadequate Government funding.
- ii. Brain drain due to inadequate staff remuneration and retirement benefits.
- iii. Establishment of other institutions offering health and allied health sciences education.

#### 3.2.1.2 SWOCs analysis in Research and Consultancy

#### Strengths

- i. Existence of effective management systems for research.
- ii. Presence of a good number of well trained and experienced researchers.
- iii. Track record of good research output.
- iv. Presence of a research agenda which defines research priorities.
- v. Effective research dissemination strategies (Research publications and annual scientific conference).
- vi. Availability of research infrastructure in some key areas.
- vii. Established links with external collaborators and development partners.
- viii. Existence of established and accessible e-resources in research.

#### Weaknesses

- i. Poor research infrastructure in some of the departments.
- ii. Inadequate multidisciplinary collaboration between scientists.
- iii. Poor incentive packages to researchers.
- iv. Inadequate capacity and aggressiveness to solicit for research and consultancy opportunities.

## **Opportunities**

- i. Willingness of partners to support research.
- ii. Existence of researchable health related issues.
- iii. The current Health Sector Reform policy, which is supportive of research.
- iv. Existence of local and international links.
- v. Increased Government commitment to support research.

## Challenges

- i. Inadequate Government funding for research.
- ii. Emerging Health Research Institutions.
- iii. Heavy dependency on donor funding.

## 3.2.1.3 SWOCs analysis in Service provision to the Public

## Strengths

- i. A pool of indigenous well-trained specialists.
- ii. Availability of specialized diagnostic services.
- iii. Existence of linkages and collaboration in community service provision.

- iv. Developed ICT infrastructure.
- v. Developed community oriented training programmes.

#### Weaknesses

- i. Inadequate human and financial resources.
- ii. Underutilization of available expertise.
- iii. Immaturity of the quality management system.
- iv. Lack of strategies to market the available services.

#### **Opportunities**

- i. Access to the Muhimbili National Hospital, Jakaya Kikwete Cardiac Institute, Muhimbili Orthopaedic Institute and Ocean Road Cancer Institute and other nearby municipal hospitals.
- ii. High demand for continuing education by the society.
- iii. High demand for health services by the society.
- iv. Good reputation of the institution among the public.

#### **Challenges**

- i. Increased competition from institutions rendering similar services.
- ii. Low purchasing power of clientele.

#### 3.3 Critical Issues

The following are critical issues that emanate from SWOC analysis which will guide this strategic plan

- i. Effective teaching and learning of demand driven programs
- ii. Evidence generation from high quality research
- iii. Client centered preventive and curative health care
- iv. Shortage of Human resource
- v. Financial sustainability
- vi. Gender, environment and social development
- vii. Corruption incidences

## 3.4 Current Issues

Muhimbili University of Health and Allied sciences has a long-standing quest to expand its infrastructure to be able to implement its core functions. MUHAS is in the advanced stages of implementation of the phase I development of the Centre of Excellence for Cardiovascular Sciences. The completion of construction of the Multipurpose building for the Centre is scheduled to complete in 2020. Further more, the construction of students' hostels, and academic facilities at Mloganzila Campus will provide expanded avenue for enrollment of students.

# CHAPTER 4 UNIVERSITY VISION, MISSION AND STRATEGIC OBJECTIVES

#### 4.1 University Vision

A university excelling in quality training of health professionals, research and public services with conducive learning and working environment.

#### 4.2 University Mission

To provide quality training, research and services in health and related fields for attainment of equitable socioeconomic development for Tanzanian community and beyond

#### 4.3 Strategic objectives

The stakeholders reviewed the objectives of the implemented MTSP and developed set of eight objectives, targets and activities to be implemented in the next five-year circle of 2020/2021 -2024/2025.

# i. Objective A: Teaching, Learning and Assessment Methods Enhanced *Rationale*

The competitive environment within which the University operates demands for quality performance in its core function of teaching and learning in order to attract the clientele and remaining competitive in the production of quality graduates, retention of enrolled students and improved institutional academic standing. The adoption of the competency-based curricula has necessitated the need to strengthen teaching, learning and assessment methods in order to impart necessary competencies to students. To achieve this it is also important to ensure faculty capacity is built.

# ii. Objective B: Research and Consultancy Quality and Capacity Improved

#### Rationale

Research and consultancy is one the University core function requiring the contribution of the University community to generate and advance knowledge and conduct implementation science research for health advancement. Research and consultancies contributes into public health intervention development and assessment, improved diagnostic and treatment through the formulation of health-related policies. Acquisition of a state of the art teaching hospital and its plans for various centers of

excellence gives MUHAS a unique opportunity to effectively build its research and consultancy capability and quality. MUHAS also needs to increase its strategic collaboration with industries and other stakeholders and strengthen the directorate of research and publication and mobilization of research funds.

# iii. Objective C: Quality evidence-based health care and supportive services to patients, clients and the community strengthened

#### Rationale

Improving Tanzanian population health through the provision of quality and evidence based preventive and curative services is a key mandate of the University. As a public health Institution, MUHAS is required to provide outreach and facility based preventive and curative services to clients. The University had a plan to improve dental clinic by enhancing the ongoing services and establishment of private dental clinic at school of dentistry as well as doctors' plaza at Upoto. Through this the university will have an opportunity to serve the community through provision of quality health care services. In addition the university will continue to conduct outreach programs for disease surveillance, diagnosis and preventive health promotion; it needs to continue to solicit of adequate human resource and financial capacity to effectively provide curative services.

## iv. Objective D: Responsive Human Resource Management and Governance Enhanced

#### Rationale

With increasing structure and function of the university, there is a need for increased human resource to optimally carry out core functions of the University. However, there has been consistent shortage of human resource over the years necessitating concerted efforts to recruit, motivate and retain the required staff. The university should continue to work with the government to acquire more employment slots, recruit staff and develop a lucrative and efficient human resource succession, development, motivation and retention scheme.

## v. Objective E: Sustainable Financial Capacity and Accountability Enhanced

#### Rationale

MUHAS as a public institution of higher learning has largely depended on Government funding in order to carry out its core functions. Although the government has been supporting capital development for Mloganzila campus, the government subventions to the university have been declining over time and have mainly covered personnel emolument and partly recurrent expenditure. The University therefore, needs to develop alternative ways for resource mobilization and sustainability.

# vi. Objective F: Gender Mainstreamed, Environmental Management and Social Welfare Improved

#### Rationale

MUHAS like other institutions of higher learning is faced with a problem of gender inequalities at different levels. The University therefore has an obligation to proactively address gender equity and mainstreaming through strengthening of the gender unit at MUHAS and adherence to the national affirmative action. MUHAS will also maintain and conserve a healthy environment and protect all-natural resources for sustainable society. Together with an excellent environment, the university will put in place strategies to improve staff and student health, social interaction and welfare, by putting in place facilities and policies that are necessary for promotion of health life styles, effective working and learning environment.

# vii. Objective G: HIV and AIDS infections reduced and Supportive Services Improved

#### Rationale

HIV and AIDS is a global health problem that has impacted all sectors of development. The epidemic has impacted lives of productive age group and affected socio-economic development. This cross cutting and detrimental disease calls for multi-sectoral approach to mitigate its effect and all institution. MUHAS as a producer of human resource for health and one of the major public institutions for higher learning has a responsibility to put in place mechanisms for prevention and control of the pandemic at the work place and therefore MUHAS have to set effective mechanism to combat the epidemic.

#### viii. Objective H: Implementation of National Anti-Corruption Strategy Enhanced and Corruption Incidences Reduced

#### Rationale

Corruption is one of the most important enemy to development and all government sectors including MUHAS have to put in place strategies to fight corruption. All government institution should ensure that their entire staffs are aware of the national Anti-Corruption laws and how to mitigate this problem in their places of work.

# CHAPTER 6 IMPLEMENATION, MONITORING AND EVALUATION

### 6.1 Implementation

The MUHAS Five Years Rolling Strategic Plan (FYRSP) will be implemented through participatory and cascading approaches. The Council's approved annual implementation plans and budgets will be cascaded into different University units (schools, institutes, directorates and departments) so that they can prepare their annual plans and budgets. Based on these annual plans, budgets and individual performance plans that are linked to the *Open Performance Review and Appraisal System* (OPRAS) will be developed.

#### **6.2 Coordination Framework**

The Directorate of Planning and Investment (DPI) will oversee the implementation of MUHAS Five Year Rolling Strategic Plan (MUHAS FYRSP). The DPI office will coordinate and offer technical services to all University units on matters concerning preparation of individual units strategic work plans and budgets. In addition DPI office will also monitor and offer services to all University Units on writing progress reports and conducting Annual review workshops. The core staff of DPI will be assigned specific University units so that they can assist or offer technical services during the development of Annual work plans and budget, and preparation of progress reports.

To ensure that the implementation of the FYRSP is holistic and participatory, there will be University wide Five Year Strategic Plan Implementation Coordination Committee FYRS PICC whose members shall be drawn from key University strategic units. This committee shall be chaired by the Director Planning and Investment (DPI). The Committee amongst other duties will approve all planning and M&E reporting tools, templates or guidelines before they are cascaded to lower University Units, It will also make recommendations to the Planning and Finance Committee (PFC) all matters requiring the attention or approval of Council. Lastly, the committees will advice the Director on all matters concerning the implementation and monitoring of the FYRSP.

For effective and efficient implementation of the FYRSP, all key University units shall establish Annual Work Plan Implementation Sub-committees. These sub committees with the support of staff from the DPI office will coordinate the development of Individual Unit Strategic Plans, prepare Annual work plans and budget; and writing of progress reports. Such plans and reports shall be forwarded to the Secretariat for harmonization before they are tabled to the FYRS PICC. The Council as a policy formulating body of the University through its Committees shall have the responsibility of playing an oversight role during the implementation of the FYRSP, by making sure that adequate resources are provided.

# 6.3 The Results-Based Monitoring and Evaluation System

As MUHAS strives to make a difference on how it conducts its business, it will adopt a result-based M&E system that seeks to: (i) focus an organization's efforts and resources on expected results; (ii) improve effectiveness and sustainability of operations; and (iii) improve accountability for resources used with the result-based M&E system, emphasis moves beyond focus on implementation (inputs, activities and outputs) to a greater focus on results (outcomes and impacts).

# 6.4 Monitoring

Monitoring is a regular follow-up of the implementation and documentation of planned activities and the extent of realization of expected results. The M&E Department will be responsible for overseeing the day to day monitoring and reporting of the FYRSP implementation. The DPI will collect, compile and analyze M&E reports from all University units and submit them to FYRSPICC on a bi-annual basis. The DPI will on a regular basis provide technical and administrative support to all university units and issue guidelines on preparation and management of results-based M&E system. For effective implementation of the M&E activities, the DPI will ensure that it operates and work very closely with FYRSP sub committees of all University units. The annual operational plans and budgets for all University units shall be synchronized and submitted to the FYRS PICC before forwarding them to the Planning and Finance Committee and then to the University Council.

Monitoring reports will be prepared at all levels (Department/ Institute/Directorate and School) on a bi-annual basis narrating the following:

- i. An extract of the respective FYRSP showing in summary form the approved Strategic Objectives, Strategies and Targets;
- ii. An approved Action Plan and Budget for the year under reporting;
- iii. Achievements in terms of actual outputs vs planned activities and outputs in the operational plan. Achievements should reflect both the qualitative and quantitative achievements; and factors that enhanced implementation;
- iv. Documentation of processes involved, lessons learned, emerging innovative features and/or best practices;
- v. Constraints in the implementation of the Strategic Plan and any internal and external factors which affected implementation; and
- vi. Proposed remedial actions and the way forward for solving the problems encountered, indicating clearly the planned activities to be carried out in the next period (six months or one year depending on the nature of the report).

When presenting the January to June implementation report, the reporting unit will also report on the whole year's achievements. Thus the report ending June will comprise the six-month report (i.e. the implementation report for January to June) and the year's report (July - June). At the end of each year, MUHAS in collaboration with its key stakeholders will undertake annual reviews of the FYRSP in order to keep themselves abreast with the progress and overall performance of esp. These participatory Annual reviews will provide a basis for formulation of the next annual work plans and budgets. As one of its functions, the FYRS PIPCC will oversee and provide guidelines for conducting annual reviews to all University units.

### 6.5 Evaluation

The aim of evaluation is to determine the relevance and fulfillment of objectives, development efficiency, effectiveness, impact, and sustainability, Evaluation will give evidence of why targets and outcomes have or have not been achieved

There will be two types of evaluation of the FYRSP. The first evaluation will he done using internal evaluators after two and half years (mid-term review-M'I'R). At the end of the five-year period both internal and external evaluations will be done. Both evaluations will each be followed by a stakeholders' workshop, Prior to external evaluation, the internal evaluators will have to

give their opinion on the progress of implementation of the FYRSP, the basis on which the external evaluators would wish to validate

The FYRSPICC with the assistance of the DPI shall prepare clear and comprehensive terms of reference (ToRs) to guide both evaluations. The internal and external evaluations will have similar ToRs and will focus on;

- i. Assessing whether the FYRSP (and related plans) is achieving the envisaged objectives;
- ii. Assessing the factors/reasons for the success or failure of specific aspects of the Strategic Plan;
- iii. Finding out whether the implementation of the FYRSP is contributing to a better fulfillment of the Mission and Vision of the University.
- iv. Assessing the adequacy of resources being mobilized to implement the FYRSP:
- v. Determining whether the available resources are being utilized efficiently to achieve the planned strategic objectives;
- vi. Determining whether the process of strategic planning and implementation is facing any problems;
- vii. Establishing lessons of experience learned during implementation of the FYRSP; and
- viii. Making recommendations on follow up matters or issue to insure the FYRSP' is implemented effectively and efficiently

## 6.6 Reporting and documentation

Reporting and documentation are important aspects of Participatory Monitoring and Evaluation (PME) and overall knowledge management. Regular reporting system shall be designed to channel information to those involved in the analysis and evaluation of the data as well as other key stakeholders. The FYRSPIC and response Directorate shall focus their efforts on how to prepare quality performance reports (i.e. Bi-annual and Annual Performance Reports as well as MTR and final FYRSP evaluation Reports), The FYRSPIC and the DPI in particular will will strive to use formal and informal mechanisms to share and disseminate important messages or information coming from these reports to key stakeholders.

### 6.7 Assumptions and Risks

The major assumptions, which need close monitoring and timely response by MUHAS management, are as follows:

- i. Availability of adequate financial resources to implement the planned activities for achievement of the FYRSP objectives;
- ii. Deployment and employment of competent and well qualified staff in the Directorate of Planning and Investment;
- iii. Continued willingness of stakeholders to support and respond effectively to the needs of MUHAS during the implementing of FYRSP
- iv. Improved working conditions to motivate and retain staff
- v. Peace and tranquility at the University

# CHAPTER 7 FINANCING STRATEGIES AND SOURCES

### 7.1 Financing Strategy

Implementation of FYRSP will constitute the day to day functions of MUHAS. These function are described in the annual action plan of the unirating. The plan will be financed through the annual allocation of development and recurrent budgets and the main sources of financing are expected to be Government subventions, internal revenue generation support from development partiners and borrowing financial institutions where appropriate.

### 7.2 Financing Sources

MUHAS expects to finance the implementation of the Strategic Plan mainly from Government bursary, internally generated revenues, contributions from development partners, and collaboration with the private sectors and other stakeholders. The Office of the Deputy Vice Chancellor - Planning Finance and Administration will coordinate resource mobilization for the implementation of the Strategic Plan. The details of the costing of the Strategic Plan will be done in the Medium-Term Expenditure Framework (MTEF) that will be developed on a three-year basis in which specific activities for implementation of the Strategic Plan will be described.

### 7.2.1 Government Funding

The Government shall continue to be the main financier of the University's activities. MUHAS expects to attract funds from Central and Local Governments to meet recurrent budget, personnel emoluments, research and development.

### 7.2.2 Internally Generated Income

During the next five year (2020 to 2025) MUHAS shall intensify measures to increase internally generated funds in order to finance its core mission activities. It has been realized that MUHAS cannot sustain itself financially by depending on Government subventions and donor funding, which keep on decreasing. To reduce budgetary dependency, generate and maintain financial sustainability it is important that MUHAS community change its mindset and the University sets aside at least 25% of its internally generated income for the development projects.

### 7.2.3 Development Partners' Funding

The Development partner's funds are currently among the important sources of funding activities such as research and capacity building. In order to increase the contribution of the Development partners, Colleges/Faculties/Schools/Institutes/Directorates/Centres/ shall be encouraged and facilitated to prepare projects/programmes proposals that stand a good chance of attracting funding from Development partners

### 7.2.4 Private Sector Funding

Tanzania has a number of local private- agencies with the potential of supporting MUHAS. However, most of the existing linkages and partnerships at MUHAS are with external partners. In implementing the FYRSP, MUHAS shall strive to identify potential local partners including financial institutions, which are ready to grant loans and forge partnership with them. In order to enhance the contribution of the private sector in financing the FYRSP, Colleges/Faculties / Schools/ Directorates/ Institutes/ Centres shall play an active role in soliciting funds from the private sector and loans from financial institutions.
